

DIESEL DIRECT[®]

Our Services and Products in a Nutshell

On-Site Mobile Refueling

We deliver high quality diesel fuels directly to your fleet's tanks with our 24-7 on-site diesel refueling service. We specialize in mobile refueling and bulk deliveries for local, regional & national truck & equipment fleets.

Additionally, we provide data driven solutions through our single source billing system in the form of accurate and meaningful data to assist in the management of your fuel consumption, regulatory compliance requirements, and your continuously evolving business needs.

BARLOC is a state of the art patent pending technology that links the vehicle to a fuel island or tank using a barcode system. With BARLOC, the vehicle itself becomes the card, storing information necessary to authorize fueling. It provides security, data management, and efficiency, and simplifies the fueling process and its versatility enables it to be used on a single tank or dispenser or a large fuel island.

Generator Fueling Services

Our knowledgeable fuel professionals will schedule deliveries to make sure your diesel power generators are fueled and ready to work when you need them. We will fuel your generators on a regular schedule and together with proper maintenance, your generators can have a longer service life and fewer repair costs.

Fuel Intelligence is our user-friendly customer portal designed to provide detailed delivery reporting, invoicing, and relevant announcements to our customers.

Diesel Direct has a fleet of vehicles specifically designed to handle Diesel Exhaust Fluid and dispense this product safely and efficiently for you. With DEF Direct, our well-trained staff will ensure that your vehicles have their complement of DEF on-board for their routes and will save you time and money! In addition to truck to truck DEF fueling, we also offer packaged product in totes, drums, and jugs.

Business Continuity Programs

Natural disasters like hurricanes, earthquakes, and blizzards can cause electrical outages, and limited access to fuel for a longer period of time than expected. This is why we offer a program to help manage your business continuity. You will have a plan in place to manage your fuel needs during a weather emergency including pre-event tank top-offs, regularly scheduled fueling, and generator refueling services.

DIESEL DIRECT[®]

On-Site Tanks

We rent out sturdy, top grade steel tanks for fuel storage purposes. These double-wall tanks start at a capacity of 500 gallons of fuel and feature a pump, hose, and mechanical meter. They are an ideal option for businesses requiring additional fuel in-between our regularly scheduled refueling visits.

RoadChamp is our premium diesel fuel which is seasonally customized to provide you with a high performing diesel in any weather. It features a cold flow improver and de-icer, stabilizer, moisture control, lubricity agent, detergent and corrosion inhibitor.

Tank Monitoring

We have a sophisticated tank monitoring technology that will provide you with easy and automatic monitoring of your fuel and help you maximize your savings. You can have access to all of the important details regarding your tank including its location, products, and current level readings.

Dry Edge is designed to solve negative issues caused by water. This additive provides enhanced moisture control and can reduce water contamination in fuel tanks, generators, and storage tanks. It is designed to complement Diesel Direct's RoadChamp premium diesel or other diesel fuels.

This is our proprietary formula designed to clean, stabilize, and provide cold weather protection for diesel fuel stored in generator tanks as well as fuel tanks of all sizes ranging from large bulk tanks to small skid tanks.

In addition to our comprehensive suite of offerings, we are licensed by the U.S. Coast Guard to supply & replenish marine fuel for large commercial vessels. We are proud to provide the same high quality fuel delivery and services we have always offered for land use now for use in the sea.

This product is our diesel fuel emergency treatment designed to give you an edge when extreme winter weather challenges your fuel performance. It can help melt frozen fuel filters, restore fuel to liquid state, disperse water, and is effective in diesel fuels including biodiesel blends.

Diesel Direct is strongly committed to sustainable energy and we take pride in providing the safest and most ecological fuels possible in the most energy efficient way. We are proud of Pure Energy, our expanding green portfolio.
