

DOWNGRADE

THE NEXT EMERGENCY.

BUSINESS CONTINUITY

With fully fueled tanks and generators in place,
**YOU'LL HAVE
ONE LESS WORRY.**

Keeping your business running at its full potential every day of the year is a whole lot easier when you have fully fueled tanks and generators ready and waiting. In fact, customers nationwide protect their operations by supplementing Diesel Direct fuel delivery with on-site tanks and generators for extra protection in emergencies.

At Diesel Direct, we will schedule deliveries to make sure your diesel power generators are fueled and ready to work when you need them.

Power on through every emergency.

We respond to thousands of emergencies each year. Our fleet is permitted to be on roads that are closed to the public during weather emergencies. When bitter cold, hurricanes, earthquakes, or other natural disasters occur unexpectedly and cause electrical outages, we can still deliver. Diesel Direct's Business Continuity Plans include precautionary fueling services so backup power systems such as diesel-powered generators are ready to take over during an electrical or power outage and our customers never go for extended periods of time without fuel.

Business Continuity Plans minimize the risk of property damage and break-ins. They reduce the risk of insurance claims from compromised safety and security. Plus, they help save everything from perishable goods to the electronic data that could be damaged by power surges. Most importantly, with a plan in place, people are safer: patients and employees at healthcare facilities and hospitals never go without power during emergencies; retirement communities don't lose heat or A/C; and schools keep their lights on. Our emergency fueling team stands side by side with those men and women fighting disasters by providing them with the fuel they need to keep their communities safe.

The Business Continuity Plans ensure we get there before the emergency hits, so you are prepared well in advance. We offer different levels of protection, so you can choose the plan that is right for you. During any event that strikes, these plans save the day with mobile fuel islands, a dedicated on-road fleet, DOT approved tanks and all the fuel you need to weather the storm.

**Select the Business Continuity Plan that is best for you
(greater peace of mind is part of every plan).**

SILVER

Provides an extra level of service above and beyond the regular on-site fueling plan:

- + Scheduled fueling ensures fuel never goes below your "minimum" fuel-level.
- + We top-off your tank right before a predicted major event occurs.

GOLD

The second highest level of protection and provides priority of service for fueling.

- + Disaster Recovery Testing helps us customize your plan.
- + We recommend and implement an additives strategy to prolong your tank life.
- + We perform forensics services on fuel in the tank as needed.
- + Scheduled fueling ensures fuel never goes below your "minimum" fuel-level.
- + We top-off your tank right before a predicted major event occurs.

PLATINUM

The highest level of protection Diesel Direct provides priority of service and fueling and more.

- + Configure and monitor all tanks with a fuel monitor.
- + Disaster Recovery Testing helps us customize your plan.
- + We recommend and implement an additives strategy to prolong your tank life.
- + We perform forensics services on fuel in the tank as needed.
- + Scheduled fueling ensures fuel never goes below your "minimum" fuel-level.
- + We top-off your tank right before a predicted major event occurs.
