

OUR FULL RANGE OF TANK SOLUTIONS
HELP BUSINESSES

STAY UP AND RUNNING

through all sorts of weather
and power emergencies.

They even store peace of mind.

Tens of thousands of companies nationwide rely on Diesel Direct to keep their businesses operating smoothly – 24/7 – every day of the year.

Tens of thousands of companies nationwide rely on Diesel Direct to keep their businesses operating smoothly – 24/7 – every day of the year. Our top-of-the-line, certified steel tanks can save the day in emergency situations with the backup power needed to weather any storm. Diesel Direct tanks also help lower fueling costs with fewer deliveries. The savings add up for organizations requiring additional fuel in-between their regularly scheduled visits. Options include fuel storage tanks, gasoline tank trailers, temporary and permanent tanks and tanks custom-made for specific needs. We refuel the tanks on a regular schedule and incorporate technology and monitors so we know if that schedule changes. At Diesel Direct, we will monitor and fuel them for you as well.

All our tanks are durable, portable, and feature double-wall frames that protect from external damage and internal containment. They feature built-in pumps and meters, 110% containment capacity and range in size from 500 to 10,000 gallon capacity. The solar powered specialty tanks give you an environmentally-friendly alternative. Add in the secure FUELLOC tank solution, and see where each gallon was dispensed. FUELLOC provides an added level of security with technology that guarantees fuel is never dispensed into the wrong asset. At Diesel Direct, you can rest assured you will always have the fuel you need.

Stay fully informed so you never run out of fuel.

Diesel Direct monitors your fuel levels and works with you to establish a refueling schedule that guarantees continuous power. Customers access their fuel data online through our Fuel Intelligence Customer Portal. By streamlining the process, you eliminate tasks like having to stick the tanks for fuel level readings and making unnecessary trips to top off tanks – and you avoid all the issues associated with running out of fuel.

Our state of the art tank monitoring technology provides complete and accurate inventory control in real-time. You monitor all your tank data quickly and easily in one place and can fuel your assets at the same time. Highly accurate inventory control reduces fueling costs and minimizes downtime.

This sophisticated technology applies to fuel and generator tanks of all sizes and provides you with all essential tank details:

- + Summary of all tank locations with GPS tracking on each tank monitor.
- + Tank names and fuel types.
- + Tank capacity levels.
- + Current level readings on a daily basis.
- + Capabilities of setting alarm notifications based on product temperature and level.
